

Product Data Sheet

HB-1190 WAY-LUBE

32, 46, 68, 100, 220

DESCRIPTION:

HB-1190 WAY-LUBE are products formulated for lubricating the ways of various types of machine tools. They are blended from paraffin base stocks and have been compounded with additives to impart outstanding lubricity and extreme pressure properties. These products exhibit the high film strength that allows a build-up of a heavy oil film to reduce wear and contribute to accurate system component positioning. This product contains a tackifier that prevents fluid from draining away from lubricated surfaces and minimizes fluid extraction between heavily loaded ways that may also reduce lubricant wash out by emulsifiable cutting fluids.

APPLICATIONS:

HB-1190 WAY-LUBE are manufactured for the sliding ways of machine tool systems that include planers, grinders, horizontal boring machines, shapers, and various milling machines. Way lubricants ISO Grades 68 and 100 are recommended for most machine tools with horizontal slideways in light to moderate applications. The ISO 220 Grade is suggested for those severe applications requiring a high viscosity lubricant: particularly for machines with vertical slideways.

Product Data Sheet

	<u>Typical Properties</u>				
ISO Grade	32	46	68	100	220
AGMA Number (Reference)	0	1	2	3	5
Texture	<-----Stringy ----->				
Viscosity, cSt					
At 40 C	32.5	45.5	67.6	101.8	220.9
At 100 C	5.3	6.6	8.5	11.2	18.8
Flash, COC, F	385	390	395	410	455
Viscosity Index	95	95	95	95	95
Pour Pt, Deg F	-10	-5	-5	0	5
Deg C	-23	-21	-21	-18	-15
Gravity, API @ 60 F	31	30	29	28	26

The values shown are typical of current production. Some are controlled in the manufacturing process, while others are not. All of them may vary within tolerable ranges.
