

Product Data Sheet

HB-1142 POWER STEERING FLUID

DESCRIPTION:

HB-1142 POWER STEERING FLUID is a premium product formulated from highly refined base oils and carefully selected chemical additives to meet the performance demands of powering steering systems. This product is designed to protect power steering systems against pump deterioration by preventing abnormal oxidation, foaming, and wear. This product is compatible with commonly used seal and hose materials to ensure excellent service life from these components. This product is formulated to a higher viscosity index with excellent low temperature properties which provide protection when operating over a wide range of summer and winter temperature conditions.

APPLICATIONS:

HB-1142 POWER STEERING FLUID provides performance characteristics in power steering systems for most automobiles, light trucks, farm equipment, and applications calling for hydraulic power steering fluid.

****This product is not recommended for Honda power steering systems or requirements of Chrysler fluid specification MS-1872-T composed of a mineral oil without additives.**

Product Data Sheet

Typical Properties

Appearance	Light. Amber Clear
Flash, COC, Deg F.	360
Pour Point, Deg F.	-40
Viscosity, cSt	
At 40 C.	37.84
At 100 C.	7.14
Viscosity Index	154

The values shown are typical of current production. Some are controlled in the manufacturing process, while others are not. All of them may vary within tolerable ranges.
